Academic History

Dayananda Sagar Academy of Technology and Management (2017 - 2021)
B.E Information Science and Engineering   7.7 CGPA

Experience

Java Developer - LTI (2021-2023)

Citi KYC- Development (January 2022)

- I was part of the migration team responsible for transitioning the rules implementation from Java to DMN.
- The project aimed to evaluate KYC records against country-specific rules, routing compliant records to the appropriate approvers.
- I analyzed the existing Java codebase and successfully migrated the rules to DMN in Business Central using FEEL expressions.
- Additionally, I developed JUnit test cases for the Java codebase employing PowerMock for mocking dependencies.
- I conducted comprehensive end-to-end testing of the migrated codebase, ensuring its functional accuracy and robustness.

 Skills / Stack - Java, Spring-boot, JUnit, Oracle Database, Microservices

Online Exam System   (September 2021)

- The Online Exam System is a web-based platform designed to facilitate remote examinations for students, companies, and various organizations, delivering instant results.
- I contributed to the development of multiple frontend modules within the application, focusing on enhancing the user interface and user experience.

Skills / Stack - Java-8, REST API, Spring -Boot, Hibernate, Angular

Summer Intern - Leeway Hertz Technologies Pvt. Ltd. (August) - 2020

- We developed a stellar wallet for transactions of its native cryptocurrency, Lumen (XLM). My contributions included designing a user-friendly interface for the wallet and ensuring seamless navigation and accessibility.

Technical Proficiency

Languages	- Java, SQL ,HTML, CSS, FEEL
Technical Skills	- Java 8, Spring-boot, JUnit, Oracle Database, Microservices, REST API
Tools	- Jira , BitBucket

Certification and Badge Experiences

- Oracle Certified Professional: Java SE 11 Developer
